Lisa Haemisegger Allis
MONKEYS ARE ELECTROCUTED ON THEIR GENITALS AT THIS UNIVERSITY:
Nearly 2,000 monkeys are being held captive at the Wisconsin National Primate Research Center (WNPRC)1. They are locked in steel cages, in windowless rooms. Not only do they deal with the stress of an isolated existence, these monkeys are being put through torturous experiments.
The caged macaques are forcibly bred. Almost as soon as the babies are born they are taken from their mothers just as forcibly. Wailing in terror, the newborns are tattooed with an identification code. And when they are old enough to meet the testing criteria, they are shackled by the neck and electrocuted in the genitals.
